### Bridge

Here I am, open wide  
Just as scared as you about last night  
How we come undone  
I don't care what's wrong or right  
You are all I need to sleep at night  
In my arms you belong

### Pre-chorus

And every time I think about you leaving  
I can't pretend that I'm not afraid  
Can we put the past behind and start a new day

### Chorus

You got to take one step back to get one step closer  
babe  
We got to cross one more bridge to see what's on the  
other side  
I wanna have one more chance to prove that I am good  
enough for you  
You got to take one more breath to breathe in time

### Oooh

### Bridge

Morning brings another day  
It hurts me when I see the empty space  
In the bed remain

### Pre-chorus

And every time I think about you leaving  
I can't pretend that I feel no pain  
Can we put the past behind start over again

### Chorus

You got to take one step back to get one step closer  
babe  
We got to cross one more bridge to see what's on the  
other side  
I wanna have one more change to prove that I am good  
enough for you

You got to take one more breath to breathe in time

Oooh

Bridge

Every night when I am laying down

I know you're the last thing I am gonna see

Got to realise you and I said a lot of words we didn't  
mean

Chorus

You got to take one step back to get and one step  
closer, babe

We got to cross one more bridge to see what's on the  
other side

I wanna have one more chance to prove that I am good  
enough for you

You got to take one more breath to breathe in time

Oooh

We got to take one more breath to breathe in time
