There is something, you must realize  
What you have, what you can lose  
I'll be gone one day  
Tell me now  
If our love was real or just a game  
Would you care if just heard my name  
I give you one more chance

Together we can make it through  
Broken words and lies  
I can feel you deep inside my soul  
And that's everything

I am the woman in your life  
I can show you what is right  
Making love all through the night  
I am your woman  
I will lead you to the light  
Everything is out of sight  
I'll show you love and all about  
I am your woman

Your woman  
You're the man I always wanted to give my hand

You never know what you are looking for  
So this time you know, you should be sure  
Hear me now, what I am telling you  
You must believe, can't you see that you belong to me  
This time it's serious

Together we can make it through  
Broken words and lies  
I can feel you deep inside my soul  
And that's everything

I am the woman in your life  
I can show you what is right  
Making love all through the night  
I am your woman  
I will lead you to the light

Everything is out of sight  
I'll show you love and all about  
I am the woman in your life

I am the woman in your life  
I can show you what is right  
Making love all through the night  
I am your woman  
I will lead you to the light  
Everything is out of sight  
I'll show you love and all about  
I am your woman

Your woman  
You're the man I always wanted to give my hand

I am
