

## 3 EB "Darkness"

Visit "[Darkness](#)" on [MotoLyrics.com](#)

Blue come over  
Born a joneser  
And the cops roll out the radar  
And shoot devious grins  
Another day begins  
I want someone to know me  
Maybe tell me who I am  
Cause I've faced down my demons  
And cried out to a god  
A God I've never seen  
Lights  
And the world darkens around me  
Strange friends all surround me  
New ideas in my head start to burn  
Dropped out of schools cuz of things that I never  
learned  
And the world darkens around me  
World drakens around me  
I want you to love me

Like you did before you knew me  
And i never thought there'd be any help  
For somebody like me  
A vacancy  
Sing  
And the world darkens around me  
Strange friends all surround me  
New ideas in my head start to burn  
Trust no one is the one thing that I learned  
World darkens around me  
Bring me the sun  
Slide off the moon  
Yeah, you better get home soon  
Slide off the moon  
There's no hope, for people like you and me  
Bring me the sun, cause I slide off the moon  
Bring me the sun
