

## Artillery "The Eternal War"

Visit "[The Eternal War](#)" on MotoLyrics.com

Invaders came in from the ocean  
Tortured and killed all our men  
Raped all our women and burned down  
The world we had build up through the years  
There's no way out of this torment  
They killing us all one by one  
We're washing the blood of our bodies  
But soon they return again

Invaders - they raped our land  
Invaders - death by their hand

They taking control of our system  
Tortured and killed all the damned  
To fight against all the violence  
We all stand apart till we die  
What will become of our culture

When madmen have taken control  
To be a sign of our time

They came in from the sea  
In the dead of night  
Blood and misery  
In the night you could hear  
The screams from those who died  
By the hand of the invaders

Who are you creeps that are ruling  
Our lives and finally our death  
Are you the evil inside us  
That's no longer our friends  
Are you the master's punishment  
Or are you the soldiers from hell  
Maybe the fight against evil  
Is only a fight against ourself
