There's no originality anymore.  
So just follow the trend and you're sure to be adored.  
There's no individuality anymore.  
Look like everyone else and you're sure to score.  
Is there a brain inside of you?  
Can you open up your eyes to see the clues?  
Can you think for just one second about who you are  
and what you're doing?  
You're either being screwed or the one doing the  
screwing!

Looking for an answer.  
Looking for the truth.  
I'm never gonna find it  
Looking up to you.  
Looking for an answer.  
Looking for the truth.  
I've given up on reason.  
You gotta look inside of you.

We're born, we learn, we work, we die.  
Everyone's just trying to get a piece of the pie.  
As we become their mindless slaves.  
And follow blindly into the latest craze.  
We don't need no MTV to tell us how to live our lives.  
How to look, how to dress, how to change our fuckin'  
minds.

Looking for an answer.  
Looking for the truth.  
I'm never gonna find it  
Looking up to you.  
Looking for an answer.  
Looking for the truth.  
I've given up on reason.  
You gotta look inside of you.  
There's no originality anymore.  
Sound like everyone else and you're sure to be adored.  
There's no individuality anymore.  
Look like everyone else and you're sure to get your  
whore.  
Is there a brain inside of you?

Can you open up your eyes to see the clues?  
Can you think for just one second about who you are  
and what you're doing?  
You're either being screwed or you're the one doing  
the screwing!

Looking for an answer.  
Looking for the truth.  
I'm never gonna find it  
Looking up to you.  
Looking for an answer.  
Looking for the truth.  
I've given up on reason.  
You gotta look inside of you.

Well if you don't like how you look,  
We'll cut and stitch you up good.  
You've got more foreign parts than Honda underneath  
your hood.  
You think you can fix anything with chemicals and  
knives.  
But you can't fake beauty if you're ugly on the inside.

Looking for an answer.  
Looking for the truth.  
I'm never gonna find it  
Looking up to you.  
Looking for an answer.  
Looking for the truth.  
I've given up on reason.  
You gotta look inside of you.
