(Oooo)

(Ooo)

We watch our heroes go to war,
And our communities help the poor,
There must be a better solution,
To save the world from our pollution,
Habitats ruined by cutting down trees,
We're faced with more endangered species,
Help us do what's right,
Come out the dark and keep the light.

(Chorus)

Mother Nature's grieving,

(Grieving)

About these horrible gifts we're leaving,
As our world cries polluted tears,
Everyone's nightmare's turns into fears,
Where is the hope on which we can depend,
Or will we continue to forge our own end.

(En-d)

As the oceans fill with oil,
It's other's lives that we spoil,
It's pretty sad that they've got no choice,
And they can't speak up even though they've got a
voice.

(Oo-oo)

(Chorus)
