"Tremor"

Visit "[Tremor](#)" on MotoLyrics.com

When time accelerates
People just fade away
Life seems a distant space

Heart inside reverberates
Lights shine along the way
Can't decide to go which way

When time accelerates
People just fade away
Life seems a distant space

Why we have to think before we see, before we feel,
before we cry
Why we have to learn the ways to be, to speak, to learn
to live our lives

Why we have to think before we see, before we feel,
before we cry
Why we have to learn the ways to be, to speak, to learn
to live our lives

When time accelerates
People just fade away
Life seems a distant space

Why we have to think before we see, before we feel,
before we cry
Why we have to learn the ways to be, to speak, to learn
to live our lives

Why we have to think before we see, before we feel,
before we cry
Why we have to learn the ways to be, to speak, to learn
to live our lives
