Are you ready for this  
Woah oh  
We're gonna change the world  
Woah oh

It might be harder than we think  
We know we can do anything  
If we stride for it now  
Take a gun  
Load it up with one  
Just for fun

Tell me you don't want this anymore  
I can fight this war without you

Run run run I see the gun  
And the flames we set to this town  
Burn burn burn all your selfish lies  
My opening line is for you

This war is old  
One to unfold  
And did you ever think that  
Did you ever think that

This is our world  
We'll make it turn  
And all of the evil that's on it  
We'll kill it again

And all of the evil that's on it  
We'll kill it again

If you want to save the world  
You've got to stop all the fighting  
Begin all the trying  
Don't let them stop you  
It's your right  
Your life

Tell me you don't want this anymore

I can fight this war without you

Run run run I see the gun  
And the flames we set to this town  
Burn burn burn all your selfish lies  
My opening line is for you

This war is old  
One to unfold  
And did you ever think that  
Did you ever think that

This is our world  
We'll make it turn  
And all of the evil that's on it  
We'll kill it again

And all of the evil that's on it  
We'll kill it again

And I know  
That you're gone

Run run run I see the gun  
And the flames we set to this town  
Burn burn burn all your selfish lies  
My opening line is for you

This war is old  
One to unfold  
And did you ever think that  
Did you ever think that

This is our world  
We'll make it turn  
And all of the evil that's on it  
We'll kill it again

And all of the evil that's on it  
We'll kill it again

And I know  
That you're gone
