It's been a long time comin'  
But I think I've got it figure out  
Sometimes the easiest things are still  
The hardest ones to learn about  
Well I was struggin' so hard for my freedom  
And it was there all the time  
But I just couldn't see it

(Chorus)  
I think I found myself  
I think I found what I'm looking for.

Well I got sidetracked somewhere  
Tho I really can't recall just when  
I lost my inspiration and I couldn't get it back again.  
I trusted everyone else so completely  
Well I was deaf, dumb and blind  
But I'll be damned if I'll let 'em defeat me.

I'm tired of tricks and politics  
And future's burnin' bright  
I'm on the line and out of time  
For once in my life  
I'm gonna do what I think is right.
