"Focus"

I'm looking high
I'm looking low
For answers that nobody knows
My eyes are getting sore
What have I found?

I'm glad this song is short
There's not much to report
Let me think about it..
Oh yeah!

The answer to your bleeding pain
Are locked inside your tiny brain
Experience and time will set them free
Be patient Daniel-san
The change is gonna come

So many tests of wit and will
But life ain't always straight uphill
So in between the swill
What will you do?
Stay out late at night
And play in the sunshine
And don't waste your time
