"No Compromise"

You say I should be careful,
About everything I say and do.
And that I should acknowledge,
That what you say is true
I got my own way to live my life,
And I'm gonna show ya how.
Do you think for yourself,
Not just for the fucking crowd.

I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
(Hey Hey Hey)

I don't seem to understand,
What you call reality
Lying to yourself and the rest of the world,
Never seemed that real to me
Stand up and be proud
Of who you are and me inside.
Oh yeah, I forgot
You always got something to hide.

I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
No compromise

I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
I'm sick of you and you and living out these lies
I'm sick of you and there's no compromise
No compromise
