"Bomb The Town"

Visit "[Bomb The Town](#)" on MotoLyrics.com

When I go back to places where we were
I see the path of affectation
It's easy to get back to a blur
Of countless inspired revelations, yeah

We're futuristic and we're on the way
So now go into a quiet meditative state
Invoke the 13th ray the vibration
It'll give you a transformation
And will serve as initiation

First you gotta break with drastic measures
Then confusion gives way to flash of light
That moment is the thing I'll always treasure
Mediocrity should never get it right but they might

In the genesis of the solar mind
Amid the fractals and the combinations
Of the signs it's not hard to find
Patterns that flow bright
And the bluest light
Now enhanced with your crystal sight

Never forget
It will be wicked
Get your ticket
Bomb the town
With a sound
Shakes the ground
Everybody

Never forget
It will be wicked
Get your ticket
Bomb the town
With a sound
Shakes the ground
Everybody get down

A mighty stupid set of currents
To swim through around me now

A bigger task to hold location
Then to swim upstream some how

The art of remaining free
Is a skill upon itself these days
The overflowing things for you to see
Others talk you out of doing your way, yeah

You've established some telepathy
And tech-remote viewing
So you're all-knowing right
Answer me how the future will be
Is it the end or just the beginning
Follow me

First you gotta break with drastic measure
Then confusion gives way to flash of light
Next your gonna find blissful pleasure
In a freedom reigning through blissful foresight, yeah

Do it smoothly
Feel the love let it soothe thee
Send ya to bliss with all the wisdom
Of the sweetest kiss
World that you know
Sacred temple
Is what you're given
Receive the medicine

Never forget
It will be wicked
Get your ticket
Bomb the town
With a sound
Shakes the ground
Everybody

Never forget
It will be wicked
Get your ticket
Bomb the town
With a sound
Shakes the ground
Everybody get down

A mighty stupid set of currents
To swim through around me now
A bigger task
