Fire is my method for destruction
leaving charred wreckage from my latest eruption
unpredictable, my erratic demeanor
bobbing and weaving as my mind gets leaner
though i'm trippin' on legs that stumble but I don't fall
down
you know I'm singing out things you mumble from a
lack of resound
pissed off mist lifts to honesty
now come down motherfucker with your philosophy

I'm at ease when I feel there's a breeze
give me a little please
Aristotle I'm not but think of Socrates
so are you ready for your lesson blood?
democratic non erratic Socratic method
we'll take away the pain
we'll pacify the bullshit up in your brain
in times of change or the same old thangs
as you maintain or rearrange

Can't nobody do it like 311
fuckin' up competition cause there really is none
steppin' on your game from the first floor up tore up
electricity we store it up

Can't nobody do it like 311
break it down, what it is, dedication
sending out gratitude like we laid it out on Down
throw down fuck the bullshit we're still the sound

Wild and lost speed mad
a long way from sad
lookin' good like you should you're bad
an itinerant dimension mystic is your spirit see

like color absolute bodiless indeed
casual kindred spirit past
all the obstacles you're dealin' with at last
the nasdaq, two puppies, baby needs new shoes
car alarms, your rent, wedding bells, the blues

The tragic fucking comedy that was last night
unfolds to my inner devils sheer delight
a pointless fucking banter in an endless bout
with whiskey soaked frolic room tobacco mouth
then a sickening trip to what I call the elitist cesspool
beckoning all the sycophants and defeated yes-fools
hung over, broke, and a round of apologies
now come down Martinez with the modern mythology

Can't nobody do it like 311
fuckin' up competition cause there really is none
steppin' on your game from the first floor up tore up
electricity we store it up

Can't nobody do it like 311
break it down, what it is, dedication
sending out gratitude like we laid it out on Down
throw down fuck the bullshit we're still the sound

Can't nobody do it like 311
fuckin' up competition cause there really is none
steppin' on your game from the first floor up tore up
electricity we store it up
