"Starshines"

Visit "[Starshines](#)" on MotoLyrics.com

I am a music lover and somehow I get paid
This song would still exist if no money was made
That's the difference
I summed it up in a sentence

I'm sittin' here perfectly still, 'cuz I've got no place to go
Be about two months until we light up the show
Follow me now I sing of spring it's a marvelous thing
What else swing the things you bring

Yo I gotta say holla
Orange County to Angola
I go back to the beat
It never lets me down
Zone in and let it rola

Yo I gotta say holla
Orange County to Angola
I go back to the beat
It never lets me down
Zone in and let it rola

I deem stream of sweat
That connects me to you
I still be all about that thing that you do
We dip dip dive so herbalize

I don't look over my shoulder but I know
There are spies
But then long time crew stuck like glue
You never let me down

We always came through
Always kept the flow
Even when you didn't know
Don't ask us we make it up as we go

Yo I gotta say holla
Orange County to Angola
I go back to the beat
It never lets me down
Zone in and let it rola

Yo I gotta say holla
Orange County to Angola
I go back to the beat
It never lets me down
Zone in and let it rola

Seems like people are the viruses
And earth is simply tired of us
So many heads what if something would give
And kill off our race, maybe diseases from space

Arriving from a comet
With a trail left for the planet
Say the wake it created was the start of the end
Filled with spores that we engineered plant pathogens

What's in the future for the view is many changes
Humans could be in danger
What would you eat to be a remainder
As your food is maimed, to take you out the frame

Some would vaporize
Some would remain the same
Suckers with no cares about the wave of the world
I feel their lives are destined for hard times too

There's a parallel universe that might be blocked
But by emotion we put in to it we could unlock
I'm not sayin' we could escape fate tunneling in this
vast
Untranslatable energy filled of dust and ash

Say what something past the starshine
What can abstain the starshine yeah
The next like your starshines
