Never again!

All my life it's been much the same game

Altogether now who pass the blame game

I'm not the one so don't put your shame on

You're not the one that I put the blame on

There is nothing I would rather do then

Get up and explain life to you friend

There is nothing I would rather do then

Get up and explain life to you

One step forward

Two steps back

Three steps forward, Go!

People want to come and take from me everything

People want to come and leave me with nothing

I'm not the one so don't put your shame on

You're not the one that I put the blame on

There is nothing I would rather do then

Get up and explain life to you friend

There is nothing I would rather do then

Get up and explain life to you

One step forward

Two steps back

Three steps forward, Go!

why do you hide

So afraid of what you'll leave behind

why do you hide

So afraid of what you'll leave behind

One step forward

Two steps back

Three steps forward, Go!

One step forward

Two steps back

Three steps forward, Go!

Who put the blame on

Who put the blame on

Who put the blame on

It wasn't my fault
