creature do the ones you hurt
come into the dreams your schemes of ripping
these lives apart who screwed you
for me its love of chase
for me its can't create
if its simply covered
say to one another
whats in your mind in your mind in your mind
that tells you
sadness speaks so softly so gently
we move thru as if eloquently show remorse
installment of what is left
installment of what is true
if its simply covered say to one another
whats in your mind in your mind in your mind
that tells you
in your mind
you know it makes you do what you do
in your head in your filthy in your head of this mind
in my mind in my head
that makes me do what i do

in your mind in your head
that makes you do this too
creature do the ones you hurt come into your dreams
your schemes of ripping these lives apart
who screwed you
for me its love of chase
for me its can't create
if its simply covered say to one another
whats in your mind in your mind in your mind
that tells you (she go...)
whats in your..... fuckin..... head
