"Long Roads"

Visit "[Long Roads](#)" on MotoLyrics.com

Where have I known you before?

Seems like lifetimes, maybe more

Our time together goes so fast

And so slowly when that time has past

I want to walk on the long roads with you, Love These
days it's all that I can think of

And the love runs so deep, these nights

I can't even sleep

I want to walk on the long roads with you

I have a place where we can quench our thirst

But we'll have to swim an ocean, climb a mountain first

The mountains high, the valleys wide

Oh just sit back and enjoy the ride

Behind us the road is fading fast

While in front of us a light shines that says the fate's
been cast

And the road we now must climb

Comes so easily one step at a time
