Don't look now, god floats through outer space  
Jettisoned from earth and human grace  
Ping Pongs through the nebular of the great milky way  
Drifting past the galaxies like superman gone up, up  
and away

Monkey falling down from monkey tree  
Monkey name the things that monkey see  
Names for food and dirt and fire, the sky and the rain  
Some for things that monkey sees and some for things  
that monkey can't explain

I believe it now  
I can feel it now  
I can see it now

Don't look now, god falls through outer space  
Curse the monkey for the human race  
Thinks way back before Nietzsche and Darwin, the old  
glory days  
Now he's scared all trembling limbs, now he moves in  
some mysterious way

I believe it now  
I can feel it now  
I can see it now

Can you hear me now  
Can you feel it now  
Can you hear me now

Believe it now
