{Interlude}

Lay your body down, mm mm

Lay your body down, mm mm

Lay your body down, mm mm

Lay your body down, mm mm

{Chorus}

How bout I be that man (be that man)

Who comes over when he's out with his friends (yeah  
yeah yeah)

And how bout I be that man (be that man)

Who rubs your body when he says that he cant

{Verse 1}

Im just what you need

Your lover, your homie, your friend in time of need

Put your trust in me

And I'll guarantee

That I'll love ya babe

And I love ya girl now faithfully

(Don't you worry you don't have to fear

Lay ya body down cause the time is finally here)

Im not gone front on you

You know you want me too

Your soaking wet

In between your legs

Lets do what we came to do, YES!

{Chorus}

How bout I be that man (baby)

Who comes over when he's out with his friends (alright)

And how bout I be that man (be that man)

Who rubs your body when he says that he can't (rubs it  
when he says he can)

How bout it? How bout it? (how bout it?)

How bout it? How bout it? (how bout it baby?)

How bout it? How bout it? (listen to me baby)

{Verse 2}

Just between me and you

No he wont have a clue

Of all this loving that Im giving to you

You don't have to be scared  
Cause he wont find out  
No no no no

Lay your body down cuase that time is finally here)
