It dont matter where you are, it dont matter what you
do

It dont matter who you know or who says that they know
you

I dont even have to share your point of view to be in
love with you

It dont matter much to me if you drink beer or you drink
tea

It dont matter but Im glad that you love the big blue sea

It dont matter if Im bound or if Im free cause youre in
love with me

Honey, when were together hours pass like minutes

And I wouldnt want to live a single day without you in it

It dont matter bout the past cause this time the cards
you drew

Are gonna make you happy instead of feeling blue

And it dont matter that this song is almost through

Cause baby the way I feel about you, Ill keep loving you
