"Born To Love You"

Visit "[Born To Love You](#)" on [MotoLyrics.com](#)

Now it's time to look in your eyes
There's no reason for telling lies
Night and day to wait for your call
Yes it hurts, to see that you got no
I will give you love forever cause I'm a fool for you
I just wanna stay together
Please don't leave me, stay forever

I was born to love you, you show me heaven
Love will last forever, forever and ever
I was born to love you, with you I'm in heaven
I will always love you forever and ever now

You're my love and my ecstasy
Please don't say that you're leaving me
I just wanna feel that you're mine
Try again, you're so far away
I will give you love forever cause I'm a fool for you...
