What you bring upon yourself  
today of all days you need help  
mind collapsing middle anguish  
cure of falling in the dark  
today of all days twilight seems so desperate  
adjacent to your prime ignition escalate  
times one  
times two  
times three  
times four  
you wouldn't know it but the kid was right  
moving sideways in a sundance to avoid the light  
depth and true distance....  
times one  
times two  
times three  
times four
