Riding through the universe
Inescapable death curse
Selective thorough genocide
By the powers of the night
Mounted on the beasts of hell
Feed upon the ones we've felled
Crushing worlds withered and grey
Nothing's sacred where we prey

Chorus:
Breakers, the destroyers of worlds
There's no greater force than the Power We Serve
Breakers, riding the universe
Wielding the force of the Power We Serve

We hunt, we slay, we mutilate
Astral riders rule your fate
When we're done there's nothing left
Just burning bones to honour death
Keepers of eternal truth
The scars we leave will be the proof
Of thousands species dead and gone
Where the Breakers' work is done
Chorus:

Another world stained with blood we've spilled
A thousand deaths, another oath fulfilled
Chorus:
