"Walking on the moon"

Visit "[Walking on the moon](#)" on [MotoLyrics.com](#)

It was just another day
and the night was closing in
so i layed down to the ground
and let my mind be free
i felt i was rising
just like there was no gravity
suddenly my journey stopped
and i walked up on the moon

i was walking on, i was walking on
i was walking on the moon
i was walking on, i was walking on
i was walking on the moon

i sit and relax
and i watch the people live on earth
sadness is coming over me
i cannot believe what i see
no blue planet anymore
and on a few green islands people fighting

i was walking on, i was walking on
i was walking on the moon
i was walking on, i was walking on
i was walking on the moon

i sit and relax
and i watch the people live on earth
sadness is coming over me
i cannot believe what i see

i was walking on, i was walking on
i was walking on the moon
i was walking on, i was walking on
i was walking on the moon
no blue planet anymore
and on a few green islands people fighting
