

45 Degree Woman "The Wait"

Visit "[The Wait](#)" on MotoLyrics.com

Open your eyes don't be afraid
Don't walk away from me
Your shiny head lead me out of here
I don't have to be alone

Rise my only child don't lead me
Into emptiness out of space
The dying sun won't let the world freeze
The wait is everlasting

And all the pain behind these silver tears
Make me feel the emptiness
Don't try to help me if I'm blue and cold
My life is good without me

With mass of gasoline burn away
These beliefs the wind reminds
With mass of gasoline burn away
These beliefs the wind reminds me of sadness

Rise my only child don't lead me into emptiness out
of space
The dying sun won't let the world freeze the wait is
everlasting
