I know you're hurting
Its getting harder every day
Waking up and working

And I know you notice
That we can find a better way
Bout waking up and working
Just to get them bills paid

Get out and hustle
Do what you love

You gotta get out and hustle
Do what you love

Life's so crazy
My past is what made me
I wouldn't be me today
I'm not living with regrets
I'm focused on what's next
Everybody's got something to say
So take a look at how we living
The drug epidemic
The streets is a home today
The youths of our world
The diamonds and pearls
Our lost need to find their way

I know you're hurting
It's getting harder every day
Waking up and working

And I know you notice
That we can find a better way
Bout waking up and working
Just to get them bills paid

Get out and hustle
Do what you love
