You creep me out, twisted head  
Cut me off left for dead  
Showing up all smiles  
So all the tears were crocodile  
Now that I can show my face  
There's another girl she's in my place  
Well have a look as I turn away  
Cause I am done with yesterday

I can feel you watching me  
Now that I am outta reach  
I can feel you watching me  
Now that I am outta reach  
I am outta reach

Missing me must be tough  
Missing you not so much  
It's an elevator going down  
Never gonna touch the ground  
After time wounds might heal  
Promises no longer real  
Fade away in my head  
I can't remember what you said

I can feel you watching me  
Now that I am outta reach  
I can feel you watching me  
Now that I am outta reach

Shaking memories of you  
Faking when I say it isn't true  
Hoping that you won't let it go  
Because I know you know I know

I can feel you watching me  
Now that I am outta reach  
I am outta reach
