Sitting at the bar staring up at the ceiling
Sipping on another beer
Life is short, summer's gone for way too long
Winter kills me every year

Chorus

I'm going down to California
Chasing the sun, radio on
I'm going down to California
Sunglasses on, here I come

Another sunny day, I drive south on the highway
Road map on the front seat
State by state, day by day, I make my way
I just stop to eat and sleep

Chorus

Palm trees do brighten my days
It brings a smile on my face
I can feel the ocean sprayin'
Sun is up, it feels great

Chorus

I'm going down to California
Going down to California
I'm going down, going down to California
Yeah, summer's on, going down to California
I'm going down to California
