I keep fallin down, because of you
And I cant help myself from, leavin you.
Pulled into the abyss of your lies, over again
Please stay away from, my life

I wont back down, I wont back down again.
I see you for, I see you for the way, you really are.
And you dont care, you dont care who you hurt.
I hope you stay, I hope you stay away, from me, my
friend.
I dont want to stay here, anymore.
Forget the things I said to, lead you on.
Youll be sorry now, when Im gone.
You look at me as I, walk away.

I wont back down, I wont back down again.
I see you for, I see you for the way, you really are.
And you dont care, you dont care who you hurt.
I hope you stay, I hope you stay away, from me, my
friend
