We pray for rain, but it never comes  
Long live eternal drought scream at the sky,  
And hide from the sun long live eternal drought

We knew it would come, the drought it will dry the tears  
away  
Never mind the lies foretold we pray for rain forever

Selfless decimation fire from the heavens  
Death is the equation pray for rain forever  
Everything is slipping further away from the truth  
We pray for rain, forever.  
Selfless decimation fire from the heavens  
Death is the equation pray for rain forever

This is a sign from the blood-lit sky  
(Lying on your back begging for my hand asking for  
mercy x2)  
The blood will flow

Never mind the lies foretold we pray for rain forever  
Selfless decimation fire from the heavens  
Death is the equation pray for rain forever

Self fulfilling prophecy,  
Death is the only option  
Remove your dignity and hold on  
Enslaved by your emotion  
It seems it will never end  
And when I remove your heart  
Eternal drought will begin

(Long live eternal drought x2)  
The time is now to rape the parasite  
And feast upon disease  
To take away your dying  
Breath fulfill my prophecy.

Long live eternal drought x4
