My life's not wasted I'm trying to give all that I've got

My life's not wasted I'm trying to love you, I need you

To need what I want

Try not to hurt me with problems 'cause problems

Ain't what I want

They'll just distract me from trying to love you

I need you to need what I want

I've got to try before I die to make these dreams come
true

All those years and all those tears

I have to come on thru

I have to come on thru

Repeat 1st verse
