(Paul Foglino)

Did you ever feel  
Like you were painted into place  
In a picture in a room  
That's decorated in bad taste  
You say "is this my best,  
Then I'm not impressed"  
You wonder how did you get here  
But it's exactly as you fear  
CHORUS

You are where you want to be  
You find yourself where you belong  
And every fool is looking for what any fool can see  
You are where you want to be  
You've tried so hard  
You think you'd be satisfied  
But you've been in too many places  
That looked much better from outside

Life's an alternating chain  
Of boredom and pain  
You wonder why you want to live  
Till you consider the alternative  
CHORUS

I know the way to happiness  
I know the secret of success  
I know the way to happiness  
It's knowing this is as good as it gets  
Did you ever feel  
Just like a song  
That you really can't stand  
But it sticks with you all day long  
It happens every day  
You can't run away  
You can't lose these walking blues  
Cause they fit you like a pair of shoes  
CHORUS
