I seek escape to reality  
The door is locked; You hold the Key  
My friends are phantoms; they disappear  
This life is confusing; I have no fear, but I'm scared

Free me  
From all the pills I take to see straight  
The voices tell me wrong

See me  
In a different light I'm not so dangerous  
I fall to the floor

My rapid cycle downfall of Corroded Memories  
Cerebral Injections; Hallucinations  
Doing things I don't remember; Was it you or was it  
me?  
I've lost my grip on reality

Free me  
From all the pills I take to see straight  
The voices tell me wrong

See me  
In a different light I'm not so dangerous  
I fall to the floor
