You're trapped to my brain inside my mind  
I follow you around cause I like to spy  
I have a little crush, baby you're so fine  
And if I looked into your eyes  
I promise you would fall for me

I'm not tryin' to scare ya  
I'm tryin' to tell ya  
I'm breakin' my rules  
I just wanna get near ya  
I'm painting this picture  
Of us gettin' closer

What's taking over me  
You've captured my heart for the night  
So won't you come closer to me  
Could be the last love of this lifetime

And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like, like, like, like

Need a cube of ice to cool me down  
I, I just wanna get close but I don't know how  
Your sexy baby makes it sick now, ha  
And if I looked into your eyes  
I swear that you will fall for me

I'm not tryin' to scare ya  
I'm tryin' to tell ya  
I'm breakin my the rules  
I just wanna get near ya  
I'm painting this picture  
Of us gettin' closer

What's taking over me  
You've captured my heart for the night  
So won't you come closer to me  
Could be the last love of this lifetime

And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime

It might must be the music taking over  
It's got a hold on both of us  
We just can't get enough  
You can speed this up or put it in slow motion  
(Live for the moment)  
The memory will last forever (forever)  
Whoa whoa whoa

And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime  
And it feels like last love of this lifetime
