50 Cent: G-UNIT

Announcer: MTV News on MTV 2

Gideon Yego: Hi Im Gideon Yego with MTV news.
4 weeks strong at number one and the Eminem Show is still outperforming almost every other record released this year. One shady fellow not included on the dvd but who we're sure to see alot of this year, is the newest soldier of Eminem and Dr. Dre's Shady/Aftermath army, 50 Cent. 50 Cent is a highly touted acid toungeed queens rapper, a staple on New York City's mixtape circuit. He's already in the studio working on his upcoming album with tracks produced by Dr. Dre, Shaw Money, and Eminem himself. Get Psyched... that is the news now.
