VERSE

We're lost in translation
Destructive atmosphere
Searching for salvation
It's just not here yet
Push dials tap phone screen
Wishing your heart was beating still
How could we not notice

CHORUS

When I took over the world
And left you in the shadows waitingâ€¦

You think in time the truest love you'll find
But for now just kiss it all goodbye
And go back to believing your alright

VERSE

Alone I pluck heartstrings
Out of tune, time to tune me
Broken mind and psyche
I start to mend consciously

PRE CHORUS

Waiting for you illusion girl
Your fictional boy
You pessimistic dreamer
Wild eyed and waiting for love

CHORUS

When I took over the world
And left you in the shadows waitingâ€¦

You think in time the truest love you'll find
But for now just kiss it all goodbye
And go back to believing your alright

BRIDGE

Just keep running shedding timid skin
I see something up ahead
Taking leaps and bounds clearing my head

Heartstrings playing run right into h..

CHORUS

When I took over the world
And left you in the shadows waitingâ€¦

You think in time the truest love you'll find
But for now just kiss it all goodbye
And go back to believing your alright

VERSE

When I took over the world
And left you in the shadows waitingâ€¦
