The things you do
The things you do

You touched my love line
So deep inside I
Never thought I'd feel so good
Oh no
No need to hide now
Open up your mind now
Let me make it understood
Because

Nobody ever said to me
All of the things we shared within
Now that I know that you can see
Let me feel you up

[Chorus]
It's the things you do
That make me fall
So in love with you
You can have it all
What else can i do
Nothin left to prove
It's the things you do
The things you do

[J rap]
You make my neck twist like the cap
From a coca-cola bottle
Wit' your body lookin' slicker than
The finest bottle
Tell me baby
Can you shimmy
Can you make me feel hot
What you got gets me in the right spot

One of the finest
Things on my mind is
How you make me feel like gold
You Queen Midas

Straight A bust
The material I bust
But the things you do
Keepin me upp'in' is a must

Nobody ever said to me
All of the things we shared within
Now that I know that you can see
Let me feel you up

It's the things you do
That make me fall
So in love with you
You can have it all
What else can I do
Nothin left to prove
(2x's)
It's the things you do
(2x's)

Give me a chance and let me in
There's no need to hide what's there within
Now that I know that you can see
Let me feel you up

You got that midas touch
I love you more than enough
For all the things that you do
(repeat w/ chorus in the background)

It's the things you do
[echoes till fade]
