All I gotta do
Is get it through to you
You take my hand and let me
Lead you away

Same old words again
He was just a friend
That's what you told me
But you're my one and only

If I tell you something now
I ask myself just how
You came into my world
Gotta keep on loving you

So let the sun shine wherever you are
It really doesn't matter how long how far
I took my time and realized
You're the only thing that matters now in my life

Just another song
While the beat goes on
You keep on moving
And I'll bring you the groove

I guess it's just the way
Nothing left to say
Hard day everyday
DJ take me away

If I tell you something now
I ask myself just how
You came into my world
Gotta keep on loving you

So let the sun shine wherever you are
It really doesn't matter how long how far
I took my time and realized
You're the only thing that matters now in my life

Stop, look, check, and listen

I freaks the funk that will keep you wishing
You're a superstar
No matter who you are
You gotta keep ya dreams
Because they're never too far

Now can you see what I'm trying to do
Realise that it's never too late now
Can you feel what I'm trying to say
Until the break of dawn

If I tell you something now
I ask myself just how
You came into my world
Gotta keep on loving you

So let the sun shine wherever you are
It really doesn't matter how long how far
I took my time and realized
You're the only thing that matters now in my life
