"Shooting Stars"

Visit "[Shooting Stars](#)" on MotoLyrics.com

Shooting stars they catch my eye, traveling across all
the universes
I wanna be way up there, touch all the stars that are far
away
Get on a rocket, and zoom away, take the journey
where your heart is found

Supernova, they catch my eye bursting into a tha tha
thousand pieces
I wanna be way up there, save all the stars from
passing away
Get on a rocket and zoom away, take the journey where
your heart is found
I am jetpacking breaking through Earth's atmosphere
out into outer space

When you wish upon a star,
bah dah dah dah dah dah, makes no difference who
you are
If your heart is in your dreams,
bah dah dah dah dah dah, no request is too extreme
You reach out and touch the sky,
bah dah dah dah dah dah, going a million miles up
high
If you reach with all your might,
bah dah dah dah dah dah, finding treasures in the
night

Oh dancing on the gravity-less,
Star-studded galaxies

Jetpacking through all the meteors
We'll never know if we don't go

Star gazing, watching comets fly by
Moon-walking on celestial skies
Oh painting blank spaces
For our very own constellations

When you wish upon a star,
bah dah dah dah dah dah, makes no difference who

you are
If your heart is in your dreams,
bah dah dah dah dah dah, no request is too extreme
You reach out and touch the sky,
bah dah dah dah dah dah, going a million miles up
high
If you reach with all your might,
bah dah dah dah dah dah, finding treasures in the
night

When you wish upon a star,
bah dah dah dah dah dah, makes no difference who
you are
If your heart is in your dreams,
bah dah dah dah dah dah, no request is too extreme
You reach out and touch the sky,
bah dah dah dah dah dah, going a million miles up
high
If you reach with all your might,
bah dah dah dah dah dah, finding treasures in the
night
