Everywhere I look around and everything I see  
I know has joined club catastrophe,  
No future, no time  
Filling up the churches so we'll die without sin  
Lives are in a self review to see where they have been,  
No future, no kind

[Chorus]

No survivors, no providers  
No decidors, no dividers  
None, their all gone  
They keep on falling out,  
Falling out of line and into the dust,  
Falling out  
Falling in their footsteps, each and everyone of us.  
Have a good time while theres still time  
Guns are blazing, skies are flaring  
When its all done, there'll be no one

Feel the mouting tension as the leaders disagree  
Fighting as they close the doors upon humanity,  
No future, no kind (No future, no kind)  
Setting all the buttons to the armageddon code  
Pressures built to maximum, its time to overload  
No future, no kind (No future, no kind)

[Chorus]

[Solo]

People dying, mothers crying,  
Last words spoken, no ones joking  
Close your eyes and you'll be over.  
Take it all away!
