And I can't wait to see your face tomorrow
And I can't wait to see you cry
Did you know I'm so sorry?
You shouldn't have taken me by surprise

I don't wanna be here anymore
Won't you please take me with you?
I want you to
Won't you please take me with you?
I need you to

We're finding it again
It's binding like a friend
Forever is too long to stay
Deliver what we know
It's turning friends to gold
Gold plated for the taste of shame

I don't wanna be here anymore
Won't you please take me with you?
I want you to
Won't you please take me with you?
I need you to

I'm finding out about you like
The way you discover that you have cancer
I should have known that I'd throw you out
Put it in a bag and throw it out
Close the deal and wipe the plate clean
We all know we have stories

Won't you please take me with you?
Take me with you
Just take me with you
Won't you please take me with you?
Take me with you
Just take me with you
