I

Got a secret no one knows locked away where no one goes

Deep inside your heart Its tearing you apart

And the pain in all you do still the shackles binding you are

Heavy as a stone you are not alone

II

When you're down look around & you'll see

I am with you

Look to me & you'll see

I will be there to guide you

Take my hand & again lead you on for you know

III

I am the answer,

I am the Way,

I am the promise

I have called your name

IV

Say you want a brand new start asking me into your heart

Down on bended knee for the world to see

And the chains around your heart fall away & break
apart

Suddenly you'll see the truth has set you free

(Repeat II and III)

V

Surrounded by darkness you stumble alone

Knowing the road that you traveled was long

I'm here beside you yes here all along

The one that will carry you on

(Repeat II and III)

VI

When you are down you think no one's around

I will be with you both night and day

I know the good times I'll see you through bad times

And you know that I'm here to stay

I am the answer,

I am the Way,

I am the promise

I am the hope you need

When you're down look around & you'll see

I am with you
