All the boys and all the girls
all the crazy people in this world
all the problems we create
all the prejudice and all the hate
But I can feel so He must be
If you kneel to love it sets you free
Life is bound to be bore
if there's nothing left worth fighting for
The young await their present fate
Violence show what we can't say
I've been around
and I don't like what I've found
Staying high above the real with chemicals
but they conceal you from the core
Then you're lost forever more
Remind yourself when you are sad
All you love is all you ever had
Keep your brother like it's you
and repell the fake until they're true
Anyone could be your friend
Trust and they will trust you back again
Watch the stars and understand
the creator's got a masterplan
The young await their present fate
Violence show what we can't say
I've been around
and I don't like what I've found
Staying high above the real with chemicals
but they conceal you from the core
Then you're lost forever more
Remind yourself when you are sad
All you love is all you ever had
Keep your brother like it's you
and repell the fake until they're true
