Violence grows, alone in your cave  
You want to beat them all  
The trial's staring at you  
You must be so wrong  
Your difference has engendered  
Their oppression  
The freak, the disturbed  
Won't be accepted  
Will be rejected  
They despise us, every flaw becomes a fiend

We are the system error  
The outcast

Don't change, it's them  
With their preconceived opinions  
These narrow-minded fools  
Who preach normality

Fuck you conformist pigs  
Your stupid hatred makes me wanna puke my  
Guts at your face  
The freak, the disturbed  
Won't be accepted  
Will be rejected  
They despise us, every flaw becomes a fiend

We are the system error  
The outcast  
We are diversity in adversity  
Unchained from this cast  
We are the freemen  
The freemen  
Those who praise freedom won't ever be silenced  
Out of the norm, you rise to be like no one else but  
Judged by them all, alienation in you is born  
You stench of difference  
In your dream to be just something else
