

## 7 Years "Forget"

Visit "[Forget](#)" on MotoLyrics.com

I lived for your attentions but you don't care about me. I was a child and feel a son of "Sir Nobody". I'm trying to forget...now I'm trying to forget. And every single day I tried to understand your face. It told me if your hands had thumped my body again. I was afraid of your intentions and above all of you today I wanna delete your actions from my minds too. I'm trying to say goodnight to every fuckin' nightmare in my minds. I'm trying to say goodbye to every single moment passing by...with you.
