VERSE

Tell me ever truly did I step out from some other time if
it's true and you knew don't you worry cause I know just
what to do I've got nothing to lose you could say that
i'm wrong but let me give you a clue.

I walked unpaved roads and sat through entertaining
trick shows so did you dig my words that you
attentively heard now if you doubt my intention please
permit me to mention without further abstention.

CHORUS

Cause sometime can be anytime I can cross the 5
points right through paradise.

VERSE

There's pollution in the air and there's no time to spare
if it's true and you knew can you say that you care. Now
the modern times can taste like sour wine, but have
some faith take some risks and don't be scared of
mistakes.

I walked through the square and played it like a
billionaire so did you dig what I said or did it go over
your head, now if you doubt my intention please permit
me to mention without further abstention.

OUTRO

Can a chance be taken and no dream forsaken in this
moment, this is the moment to take will it lead some
place in this road following where no one knows, a
mystery defined without a regretful mind and a life to
find.
