"Our Machine"

Visit "[Our Machine](#)" on MotoLyrics.com

Starting out with paper airplanes
Dreaming of those flights from scene to scene
Stepping up to continental
Ignoring all that's temperamental

Now it's our machine...

We have seen it all go south my friend
The world is not too small for us
Our dreams are way too big to bend
The world is not too small for us

Second side, just out of high school
Teachers bare their jealous love for
Stepping up to higher learning
Stepping out but flames still burning

Together we belong...

Like I told you both our souls collide
The world is not too small for us
And time can tempt to twist the mind
The world is not too small for us

New winds surround you
Two breathing as one
5 million places to run to
These streets have just begun

Ooh oh oh oh oh oh
And you who doubt love brings you home
The world is much too small for us
And you who doesn't reap what's sown
The world is much too small for us

Ahh ah ah ah ah ah ah
The world is much too small for us
Ahh ah ah ah ah ah ah
