"3011"

Visit "[3011](#)" on MotoLyrics.com

Now we're pulling the wires intravenous
your limbs are no longer your conscious behavior
if that's fine with you...

We can all live forever
We are the technology
in the year 3011
you are memories...
your head chip expired
it's dangerous if you don't jack in
and take the upgrade your memories
can all live forever

A virus is spreading
it's digital
it's easy
and painless
cause it makes you numb

we can all live forever
cause we are the technology
in the year 3011
we're fighting for our memories
in the year 3011
the wires are a part of you
as long as we keep with the times
our memories are safe
