It seems the days we spend together  
All too quickly fade away  
And even now my lonely mind  
Is full of the thoughts of yesterday  
They say 'grow up and put your mind on what you have  
to do'  
But I know I can never make it, baby, without you

I can get a good vibration  
When I put my mind on you alone  
I can get a real sensation  
Feel like I'm naturally stoned  
Naturally stoned

And now they say it's time for me  
To face the troubled world alone  
But I know I can never do it while I'm standin' on my  
own  
There's just one thing that they do not seem to  
understand  
Why can't they get it through their heads  
I need a helping hand

I can get a good vibration  
When I put my mind on you alone  
I can get a real sensation  
Feel like I'm naturally stoned  
Naturally stoned ....

Naturally stoned
