Constant threat living in a state of fear
traget us just for fucking living here
terror threats, dirty bombs, we're at code red
washington's on high alert, they want us dead
(chorus)
chemical threat, world war three
body bags for you and me
chemical threat, on DC
toxic threat's got you on your knees
fueled by fear panic driven politics

5 o'clock watch the news and get your fix
go to work but fear's eating at your mind
eminent suprise attack there's no front line
(chorus)
terror alert, toxic shock
quarantine every fucking block
chemical threat, nuclear bomb
split second and we're all fucking gone
